

# Developing YOU

How many squares do you see?

Figure 1

If you said 16, you have a lot of company. If you said 17, you are in a select group. However, there are more squares to be found. Count the squares again.

Turn to page 14.

As you can see, there are 30 squares. Here is the key question. How many squares were added from Figure 1 to Figure 2? No squares were added. The illustration simply shows you where all the squares are. This illustrates two important concepts:

1. An in-depth look reveals considerably more than a casual glance. This is true of the squares and it is also true of you; your potential and your future.
2. Most of us need someone to point out both the obvious and the not so obvious.

The word “educate” comes from a Latin word that means “to pull out.” The purpose of this curriculum is to “educate” you. It is to “pull out” the best YOU that you can be.
